

Data Sheet

Flush-mounted boxes

Description and Technical Characteristics of the Product:

The flush-mounted boxes allow installation of fixtures in 45x45 standard under plaster or in a gypsum wall.

Installation method:

The installation of sockets is possible in combination with the RAMK frame with appropriate size (sold separately). The frame mounting bracket is screwed to the box. Snap in a network or computer socket. Snap the masking frame onto the mounting bracket.

In the case of mixed installation of power socket modules with computer (or other) sockets or integrated power sockets, it could turn out that not all combinations fit together. If this is the case, please contact the technical department for a suitable solution.

Markings:

2-module box, code: PU-2/FU/FA-1200TD

4-module box, code: PU-4/FU/FA-1210TD

6-module box, code: PU-6/FU/FA-1220TD

Technical parameters:

colours: yellow

dimensions (W x H): 70x65x40mm (PU-2); 120x65x40mm (PU-4); 170x65x40mm (PU-6);

material: PE
