

Data Sheet

RAMK complete masking frame, code: see below

Description and Technical Characteristics of the Product:

The complete masking frame is used for mounting (snapping in) 45x45mm modules. The frame is mounted on standard surface-mount or flush-mounted boxes with 60mm mounting screw spacing (KD, KED, PU).

The components included: metal mounting bracket (SUP), masking frame (RAM).

In the case of mixed installation of power socket modules with computer (or other) sockets or integrated power sockets, it could turn out that not all combinations fit together. If this is the case, please contact the technical department for a suitable solution.

Installation method:

The mounting bracket is screwed to the box or its feet, after the installation of any masking covers (PM).

Snap in a network or computer socket. Snap the masking frame onto the mounting bracket.

The frame (RAMK-6) can only be mounted on 6-module flush-mounted boxes (PU-6).

Markings:

2-module complete masking frame, (metal bracket), Code: RAMK-2/M

4-module complete masking frame, (metal bracket), Code: RAMK-4/M

6-module complete masking frame, (metal bracket), Code: RAMK-6/M

Technical parameters:

Mechanical:

colours: white

dimensions (W x H): 80x80mm (RAMK-2); 80x150mm (RAMK-4); 80x210mm (RAMK-6);

material: ABS frame, metal bracket

Certificates:

CE-Declaration of Conformity
