Composite boxes - pull-out (for construction of fibre optic panels)

Description and Technical Characteristics of the Product:

The composite box (pull-out), together with the corresponding front plate, forms an optical distribution box (an example of a complete optical distribution box, fibre optic panel).

There are two cable support brackets in the front section, and there are four holes for PG13.5 grommets in the rear. Equipped with a pull-out drawer for convenient access to the interior. There is a screw with a thumb nut inside used to fix up to 4 fibre optic cassettes. The base has mouldings for attaching cables inside the box. The boxes are packed in a cardboard box.
