**Industrial adapter for construction of IPXX patch cables**

Markings:
Code: EM/IPXX-PC-AD

Description and Technical Characteristics of the Product:

The adapter allows you to prepare IP67-compliant patch cables
on your own. Protects the RJ45 socket and plug from water
ingress. Together with other components (keystone socket,
surface-mount box), it offers IP67 protection for the socket.
The design of the adapter includes a thread so it can be
screwed into an EmiterNet IP67 industrial socket.
By using two adapters and one EM/IPXX-WPC6-110 socket, a
straight IP67 coupler can be created.

Markings:
Industrial adapter for construction of IPXX patch cables, white; code: **EM/IPXX-PC-AD**

Products compatible with the adapter:

EM/IPXX-WPC6-110   STP RJ45 industrial keystone socket Cat. 6 (110) black

Technical parameters:

Mechanical:

colours - black
material: PC plastic UL94V-0, metal (screws)

dimensions (W x H x D) – 68x108x80mm

weight - g
