Cable tester (static)

Markings:
Cable tester (static); Code: EM/STT4067

Description and Technical Characteristics of the Product:
The cable tester allows you to check if the plugs in computer (RJ45) and telephone (RJ12) connections are crimped correctly. The connection status is signalled by means of LEDs. Allows you to detect faulty connections, short circuits and interruptions in the completed wiring system. The tester also has infinitely adjustable scanning speed. Powered by a 9V battery (not included).

Technical parameters:
Colour: orange - black
Dimensions: (W x H x D): 97x112x25mm
Enclosure material: plastic
Power: 9V 6F22 battery (not included)
