

HDMI F/HDMI M 90 degree angle adapter

Markings:

HDMI F/HDMI M 90 degree angle adapter;

Code: EM/ADAPT-HDMI-90

Description and Technical Characteristics of the Product:

HDMI F/HDMI M 90 degree angle adapter is used to change the way the cables are connected to HDMI keystone sockets.

Designed for use in ICT systems, audio/video systems, TV, etc.

The adapter meets the requirements of the HDMI 2.0 standard, which, among other things, provides support for 4096x2160p (4k) resolution at 60 fps, static HDR and 21:9 aspect ratio.

Note:

1. Due to the different depth of the sockets and the different ways of routing and connecting the cables, the set, including a keystone socket with an angle adapter, may not be compatible with some products (boxes, ducts, etc.).
2. The correct operation of the socket is dependent on all the elements present in the signal path and the adapter may introduce additional losses in the signal path.

Due to the possibility of different product combinations, it is recommended to check this or contact the technical department before installation.

Products compatible with the socket:

EM/KEY-HDMI/HDMI-DC HDMI type female keystone socket, white

EM/KEY-HDMI/HDMI-2.0-DC HDMI 2.0 female keystone socket, white

Technical parameters:

colour: black

dimensions (W x H x D): 22.0 x 18.4 x 25.0 mm

Connector type: HDMI male/HDMI female

Operating temperature: 0°C to +40°C

Humidity: 10 to 80%
