

## Multi-mode optical pigtails

### Description and Technical Characteristics of the Product:

The pigtails are manufactured using 900µm pigtail fibre. The pigtail can be terminated with ST, SC, FC, E2000, or LC-type connector.

The standard length of the pigtails is 2m, however, pigtails of other lengths can be manufactured according to customer requests.

Each connector which leaves the factory is tested.

Their quality is guaranteed by performing loss measurements of each pigtail leaving the production line (total loss is less than 0.3dB).
